

CLASSIC OAK RESIDENCE HALL BED

The Classic Oak bed is made from solid oak. The cross rails are mortised and tenoned into 2 ¾" x 2 ¾" vertical up rights. The hook and pin bedposts have a steel channel inserted ¾ length of the post for 7 height adjustments. The posts are routed to accept a flush-mounted 13-gauge metal pinned channel secured with high torque screws.

Each headboard is the same height at 36". This allows for a single bed to be stacked one on top of another. Please note: The slot for the hook and pin does not extend the full length of the bedpost. This prevents the possibility of splitting of the post.

These headboards meet all federal guidelines for bunkbeds.

Bed comes with Tubular steel platform.

DIMENSIONS

IN INCHES

Overall width	38 ½"
Overall length	86 ¼"
Overall height (post)	36"
Permanent stacking pin	1 3/8"
Post size	2 ¾" x 2 ¾"
Stretchers (4)	4 ½"h x 1" thick

All stretchers (cross rails) are mortised and tenoned into the vertical post.
Each joint is glued and screwed.
