

DELUXE MULTIQUILT HEAVY DUTY INNERSPRING HOTEL MATTRESS WITH FIRE BLOCKER

COVER - This mattress is made with deep quilted fire retardant damask fabric for the look and feel of a high end hotel mattress. The damask cover allows for more air flow than vinyl, resulting in maximum body breathability and dramatically less body heat buildup. This means increased comfort when compared to conventional vinyl covered mattresses.

CONSTRUCTION - This mattress contains a #312 13 gauge innerspring unit with 6 gauge perimeter border rods and full surface dimension wire grid permatators which are covered with bonded 2 oz. polyester insulator pads on each side. Four double edge guards on each side and two on each end create a very durable mattress will prevent edge collapse. The padding is made with extremely durable USPI fire blocker bonded cotton and high density 1.8 lb/ft³ polyurethane foam that will not take a set. The mattress is closed with

taped edges and contains a five year warranty.

FIRE SAFETY – This specification has passed the most stringent institutional full-scale burn tests, including California Technical Bulletin 129, UL-1895, Boston Fire Department (BFD) IX-11, California Technical Bulletin 603 and the new federal register CPSC 16 CFR Part 1633.

This high quality mattress is ideal for upscale residence halls. It offers a unique combination of maximum comfort with maximum fire safety. This mattress is also available in Inverted Seam (no tape edge).
